

To whom it may concern at the FCC:I want you to know how much I benefit from listening to XM Satellite Radio and its traffic and weather channels. I was stationed in San Deigo, California and was traveling back to Omaha, Nebraska. I listened to my XM radio during the two day trip home and frequently used the weather and news channels. XM satellite radio provided me the variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.
